1.3. Measurement and analysis

Review By Loomis, Dana , completed on 2014-12-11

*Pre-meeting peer-review form: **Section 1***

On-time completion of this review is key to the efficiency of the meeting.

Please ensure that you answer all the following points (key-in comments directly).

Overview

- a. Is the text generally readable and written at an appropriate level for the intended audience?
- b. Are the issues presented in a clear and concise manner?
- c. Are the different subsections covered in a balanced manner? In a logical sequence?
- d. Are the references appropriate/sufficient to support to written text?
- e. Does the text give enough information to inform the epidemiology on exposure circumstances and prevalence?

The text should be written as a narrative that can be understood by general scientific readers. Details of the methods can be given in a table. 1-2 paragraphs are normally sufficient for this section. Please see Monograph v 106, TCE for an example (<http://monographs.iarc.fr/ENG/Monographs/vol106/index.php>)

Focus

- a. Is the text focused on the agent under review?
- b. Is all the information adequately referenced?
- c. Are the articles cited specific enough?
- d. Are there any obvious omissions? In the outline? In the references?

Specific comments

Are there any specific comments on the text or tables (please quote line/page numbers and/or reference)?

Identification of issues for meeting discussions

- a. Did the text omit any important issues?
- b. Please identify any issues or results that are likely to be controversial and that merit discussion at the meeting.
